Acknowledgments

Doing a PhD resembles a journey through the jungle. There are so many fascinating things you can discover on the way and so many paths to choose to follow. Many people have helped me on this journey and prevented me from getting lost in the jungle. Here I want to express my gratitude to them.

Dear Ben, thank you so much for accepting me in your group five years ago. Honestly, I was very surprised you accepted me without even asking me to come for an interview to Groningen, and I hope you did not regret it ;) I have learned a lot from you, both personally and in chemistry. Thank you for your patience, motivation speeches, never ending enthusiasm and our discussions especially during the hard moments. I will never forget one Saturday in the first months of my PhD when I was really down, not being able to reproduce Jiaobing's results and you told me to go for a beer. Thanks for helping me to grow into a much better scientist over the years.

In the moments when I felt I was crossing a very dark and thick part of the jungle, suddenly a light appeared with the arrival of Luca Bernardi. Dear Luca, even though you stayed just for a short period, it has been wonderful working with you. Your passion for science is contagious, and your insights into organocatalysis and our long discussions have been very helpful in shaping the projects described in this book. You have given me the necessary kick during the start of my PhD and helped me to dive into the field of organocatalysis more efficiently. Wish you lots of luck and success in your own research.

Another shiny star, who has lighted my way and made a big contribution to this book was Sander Wezenberg. Dear Sander, you are an amazing teacher, patient, very organized and enthusiastic, with some supernatural abilities to write publications extremely fast. It was a pleasure to work with you on the anion receptor project. I will never forget the preliminary titration of our receptor with a chiral phosphoric acid: I was almost jumping in your office from happiness. Wish you lots of success, hope you will have your own group soon and I'm looking forward to reading all your new papers ;)

An important contribution to this thesis was done by Jana Volarić. Dear Jana, it has been wonderful to see you grow during your period in Groningen. Since I know you from your highschool times, I knew you held a great potential. I was very flattered when you decided to do your summer Erasmus project with me and then even to pursue a master degree in Groningen, which was for sure not an easy decision to make. I am really grateful for all the effort you put into our research of the bisthiourea catalyst, your constant curiosity and questioning of

our results. I have no doubts you will grow into an excellent scientist and I wish you all the best.

Finally, a bright star that came along was Beatrice Le Fanu Collins. Dear Beatrice, one can learn so much from you, and not just about chemistry. I have never seen a person, who after a week of trying to purify an annoying compound, still kept such a big smile on the face, always believing everything will turn out good – definitely the best attitude towards science. Thanks a lot for all your efforts in correcting our review and giving me many other useful tips for writing papers in future. Wish you all the best, I have no doubts that your students will be one of the most motivated and optimistic people on this planet :)

I would like to express my gratitude to the members of the reading committee, Prof. S. R. Harutyunyan, Prof. H. Hiemstra and Prof. G. J. Roelfes, for carefully going through my thesis, providing valuable suggestions for its improvement, and most importantly, approving it for defense.

Dear Syuzi apart from all our scientific discussions, I am really thankful for the personal discussions we had during the last few years.

Dear Edwin, thanks a lot for helping us to solve the crystal structure of the motor organocatalyst and thanks on all suggestions considering some other crystallization attempts.

Dear Wes, thanks for the CD and UV/vis insights and also for the extremely fast proof reading of my first publication. I am sorry that there were times when we were each other's nightmares. But even after your worst nightmare (of me getting pregnant) got true, I think it was not so bad after all :) In the end, even though sometimes your words caused that the water level of the channels in Groningen rose, I know you just meant the best for me. And over the time I realized you were often right. Suppressing my chaotic nature indeed helped in finishing some projects properly.

Dear Adri, I admire your passion towards teaching and it was a huge pleasure working with you on the course of organic chemistry. As well, I am thankful for the synthetic discussions we had.

Dear Katalin and Wiktor, thank you for the valuable scientific discussions we had.

Many thanks go to Monique and Theodora for their help with instrumental analysis. Pieter, thanks a lot for always being ready to help me solve NMR issues.

Thanks go to all the members of the motor subgroup for numerous discussions. For the ones regarding synthetic issues I would like to specially thank Peter, Depeng, Stefano and Tom. And for various cross-coupling discussions thanks go to Carlos, Massimo, Beatrice and Dorus.

Dear Tineke, you definitely are the mother of our group. Apart from being amazingly organized and helping us to solve all kind of things, you are always there when someone is in need. Like every good mother you always know what to say to your children. It is hard to imagine how our group functioned without you. Thanks for everything!!

Apart from doing science, Groningen is an amazing place to meet great people, learn all kinds of dances (from hip-hop to salsa) and play various instruments. It is indeed a unique place, with so many various cultures and opportunities. There are many people who have made my stay in Groningen unforgettable, so here I want to thank them.

Raquel and Tilde, thanks for accepting the challenge and agreeing to be my paranymphs. Raquelina, it was lots of fun to get to know you closer during the organization of our workweek in Strasbourg. You spread so much positive energy around you that it is impossible to be in bad mood next to you. Thanks for all our dinners and going out. Especially thanks for the offers of babysitting Natalia :) I am sure we'll have much more fun moments in the future together with our families ;)) Tilde I was so glad you came with Rik this summer to Croatia and had lots of fun. Even Natalia can't resist your charisma ;) It was lots of fun preparing the choreography of "Dance your PhD" with you, and the original song we used for the Charleston part still goes through my mind. I am sure we'll have more dinners and travels together, especially since you are now a regular visitor to Austria ;)

Claudina, Patatina, luckily thanks to EasyJet we'll be able to see each other more often in the close future. Apart from many funny moments and dinners, we shared some motor problems ;) I wish we had made the original of McMurry-psychotherapy scene for the "Dance your PhD" movie :P

Laurens, it was a great coincidence and lots of fun that we were Groningen representatives in the semifinals of Fame-Lab. Thanks a lot for the help with the translation of my thesis summary to Dutch, and hope you improve your Croatian until your defense ;)

Adi - party beast, thanks a lot for showing me the true nightlife of Groningen already during the first few weeks of my PhD. Apart from being an amazing scientist, you are truly a great friend. I wish you and Anisha all the best in future.

Arjen, thanks for showing me around the dark corridors of the C-wing and accepting to be my salsa partner, it was lots of fun :)

Wojtus, it was so nice to see you grow in your self-confidence. Thanks a lot for all our funny coffee breaks.

赵德鹏, thanks for your patience teaching me proper Chinese pronunciation and discussions over good food. Wish you lots of luck in your future research in Guangzhou and hope we'll visit each other. 谢谢

Jinling and Henrieke keep spreading positive morning spirits in the C-wing ;)

Thanks a lot to all other C-wing members for making lab days interesting and making me a stronger person.

Anne thanks a lot for helping out with the accommodation back in Groningen.

Suresh, I miss cooking sessions with you. We still sometimes make chapatti at home, but making samosa without you is a huge challenge.

Dear Michael thanks for all the dancing and cooking sessions ;)

I had lots of fun over the years with the most charismatic group at the Stratingh Institute - Syuzi's group. Guys, thanks for all the dancing nights, funny travels and dinners. Jiawei, thanks a lot for the wedding invitation and making the China travel one of the most memorable in my life ;) Wish you lots of luck in UK and hope to see you soon :) Francesca, Pablo, Ciccio, Simone, Juanfer, Mamen, Rik, Ravi and Xingchen-thanks for everything :)

Ottomans were definitely the craziest group out there. Nekane was the glue making all of you stick together, hope you'll get another gluer soon. Nekane, thanks for numerous fun-times, pilates trainings, movie nights, paella nights and your laughter that was spreading all around the A-wing, sometimes even reaching the C-wing ;) I am sure we'll continue to see each other regularly ;) Piotr, you were definitely the heart of the group, causing lots of emotions and funny situations. Apart from being a great scientist, you are an extremely funny person and a good friend, thanks for all the crazy moments from piercing your ear to dying your hair :P Jan, thanks for all the nice dinners at your place together with Marta, Jan and Emil. Giulia, you are really the best cook at Stratingh, thanks for the amazing night when we made so much of chocolate cakes and all the nice moments at the "Amigo". Ivica, thanks for being a great friend, and almost a brother during the time we were neighbors. You even became a great cook during that time ;) Boris, continue being yourself ;) Gael, hope you are still being the best known party person in Groningen. Yigit, thanks a lot for editing the dancing movie, it was a challenge. Andreas, Jim,

Shuo, Meniz, David, Guillermo keep rocking and preserve the special reputation of your group.

Giovanni, Peter and Tao, it was always nice to join you occasionally during the lunch or breakfast break ;) Giovanni, you still owe me a proper arancini recipe:P

Seb, Matt, Vittorio, Emma, Carlos, Valentin, Nathalie, Matthieu, Celine, Ana, Manu, Ivana and all the others that have spread amazing positive atmosphere around tnx for evth and keep spreading fun wherever you go☺

Green building gang: Bea, Steven, Tizi, Miriam, Gosia, Michael, Felix, Paul, Jonas, Zuzia-thanks for making some of very special green borrels;) ☺

Wijnand, thanks a lot for making us experience Groningen like locals. Wish you and Maaïke all the best in future :)

Ivan, thanks a lot for putting the idea for the cover into a piece of art :) Hvala ti na svemu.

Jasmina, Joanna, Juraj, Marko, Tomislav, Vedran, Zdravka thanks for all the support over the years :)

Mama, tata i Dario puno vam hvala na svemu. Bez vas ove knjige ne bi ni bilo. Mama ti najbolje znaš da rječima ne mogu opisati koliko sam ti zahvalna što si uskočila u pomoć kada je bilo najteže. Natalia definitivno ima najbolje baku i didu na svijetu. Draga moja Natalia ti si bila moja najveća inspiracija da završim ovaj doktorat na vrijeme, puno te volim:**

My dearest Krzysz, thank you for always being there for me and always making me laugh. Looking forward to all our future moments together, no matter where we end up, I know with you it will be a great journey. Kocham cię :)

Matea
